

MATTHEWS

A close-up photograph of a dandelion seed head with its seeds blowing away, set against a dark red background. The seeds are captured in motion, creating a soft, ethereal glow. The stems of the dandelion are visible at the bottom, showing the characteristic elongated seed pods.

FAN COMPANY

PRODUCT CATALOG
Volume III

Matthews Fan Company has been at the forefront of bringing unique ceiling, wall and portable fan products to both the residential and commercial markets since 1992.

Our innovative fans combine traditional, contemporary and industrial designs, retrospective elements and always high performance.

Matthews proudly integrates American parts and labor into the production of all of our products.

Visit one of our retailer partners or contact us for more information regarding our quality products and customization.

Tel: 847-680-9043

Fax: 847-680-8140

www.MatthewsFanCo.com

An aerial photograph of a dense forest of evergreen trees, likely spruce or fir, showing a variety of green shades from deep forest green to lighter, yellowish-green at the tips of the trees. The word "GREEN" is superimposed in the upper center in a large, white, bold, sans-serif font.

GREEN

MATTERS

Matthews' fans achieve some of the highest efficiency ratings in the industry through:

- DC Motor technology allows for large, powerful blades which provide more robust airflow and ultra-quiet operation.
- Rotational fans reduce HVAC costs by mixing ambient air more thoroughly.
- Directional and Wall fans provide columnar airflow which can be customized.

Matthews does not field destroy

- 95% of damaged and defective materials are recycled or re-purposed.

Matthews achieves low defect rates because:

- All fans are visually inspected before shipping.
- All rotational and oscillating fans are bench tested before shipping.

Acqua

The Acqua 360° rotational fan is thoughtfully designed to resemble the molecular structure of water, Earth's most precious resource. The Acqua offers fluid lines and quiet axial rotation. Its fan heads can be infinitely positioned in 180-degree arcs for optimum air movement; the greater the angles of the motors to the horizontal support rods (up or down), the faster the axial rotation. A slow, controlled axial rotation is achieved by both fan head position and fan blade speed. Matthews rotational fans circulate heat and air-conditioning more efficiently than traditional paddle fans. Constructed of cast aluminum and heavy stamped steel, the Acqua carries a limited lifetime warranty.

Dagny LK

With clean, fluid lines, the Dagny LK 360° rotational fan is a striking centerpiece in any space. Its movement about its cylindrical center housing is smooth and quiet. Dagny LK's dual fan heads can be infinitely positioned in 180-degree arcs for optimum and customized air movement. As the angle between the fan heads and the horizontal support rods is increased, so does the speed of Dagny LK's axial rotation. Matthews rotational fans circulate heat and air conditioning more efficiently than traditional paddle fans. Constructed from cast aluminum and heavy stamped steel, the Dagny LK carries a limited lifetime warranty. This model is also available without a light kit as the **Dagny**.

Eliza

Geometry in Motion

Designed by Chicago architect Stephen Katz in 2013, the wet location Eliza blends a beautiful technically derived form with superior function and movement. The unique blade shape is designed to maximize air movement at the outer edge of the blade. The result is more efficient air velocity rings, less blade drag and greater motor optimization. Equally important is Eliza's stationary visual statement which combines modern utility with minimalist geometry. Constructed of cast aluminum and heavy stamped steel, the Eliza has a limited lifetime warranty.

Eliza-H

Geometry in Motion

Designed by Chicago architect Stephen Katz in 2014, the Eliza-H ceiling-mount fan blends a beautiful technically derived form with superior function and movement. The unique blade shape is designed to maximize air movement at the outer edge of the blade. The result is more efficient air velocity rings, less blade drag and greater motor optimization. Equally important is Eliza-H's stationary visual statement which combines modern utility with minimalist geometry. Constructed of cast aluminum and heavy stamped steel, the Eliza-H has a limited lifetime warranty.

Kaye

The beautiful Kaye 3-speed versatile-mount, wall or ceiling fan, oscillates left to right, forward and reverse, in a 90° sweep. Its design is reminiscent of vintage train cabin ventilators of yester-year, and will cool down your favorite space with poise and determination. Kaye's profile is low, however its strength and character define it. Kaye can be mounted in any small or awkward spaces or in front of HVAC ducts to improve the efficiency of the heating, ventilation or air conditioning of your favorite space. Constructed of cast aluminum and heavy stamped steel, the Kaye carries a limited lifetime warranty.

Blade Pitch	31°

STANDARD EQUIPMENT

Safety cage
Side-mounted wall junction box

ACCESSORY

White Decora-style, 3-speed wall control

Black 3-speed RF remote control

Note:

- 1) A three-wire system is needed to operate the oscillation mechanism independent of the fan blades.
- 2) The remote control receiver will not fit behind the wall canopy. A clever electrician will need to hide the receiver in wall or ceiling according to code.

Laura

The Laura 3-speed, left-to-right 90 degree oscillating wall fan offers the best in function. Its patented design boasts a whisper-quiet DC motor, remote control operation and easy 2-wire installation. Compact and powerful, Laura can be mounted in small, awkward spaces or in front of HVAC ducts to improve the efficiency of heating, ventilation or air conditioning. Constructed of cast aluminum and heavy stamped steel, Laura carries a limited lifetime warranty.

Lindsay

The Lindsay ceiling fan offers a simple, yet refined air flow solution to any space. The two elegant, solid wood blades quietly circulate air as they revolve around an understated central motor housing. Integrated into the design is an eco-friendly, dimmable LED light kit which will provide illumination for decades to come. The Lindsay is available in matte black, matte white and textured bronze finishes. Blade finish options are barn wood, matte black, matte white or walnut. Constructed of cast aluminum and heavy stamped steel, Lindsay carries a limited lifetime warranty.

Fan Projection	20 inches / 51 cm
Recommended Mounting Height	Approximately 24 inches / 61 cm from ceiling
Fan Guard	Safety Cage
Environment	Damp locations for all finishes. Neither coastal, saltwater nor chlorine compatible.
Ambience	Soothing White Noise
Safety Certification	ETL / CETL
Warranty	Limited Lifetime

NEW JAN 21, 2020 DOE MOTOR EFFICIENCY DATA

RPM (Low / High)	1213 / 1495
CFM (Low / High)	868 / 1303
Watts (High)	47.68
CFM/Watt (High)	27.32
Blade Pitch	31°

STANDARD EQUIPMENT

Safety cage	
Side-mounted wall junction box	
Decora-style, 3-speed wall control in white	ACCESSORY Black 3-speed RF remote control

Note:

- 1) A three-wire system is needed to operate the oscillation mechanism independent of the fan blades.
- 2) The remote control receiver will not fit behind the wall canopy. A clever electrician will need to hide the receiver in wall or ceiling according to code.

shown in Matte Black

Molly

Designed by Chicago architect Stephen Katz in 2018, the Molly ceiling fan combines modern organic geometry with outstanding performance and function. The blade shape was developed using advanced computer software which allowed the design to achieve a complex form. The result is a clean, natural and contemporary look perfect for any room or décor. Available in gloss white or matte black finish, Molly will complement a variety of design styles while also providing a fresh and unique, modern statement. Constructed of cast aluminum and heavy stamped steel, the Molly carries a limited lifetime warranty.

Nan

Designed by Chicago architect Stephen Katz, the Nan ceiling fan is a contemporary take on traditional fan design with superior performance and functionality. The Nan fan feels at home in any room or setting from casual to formal and everything in between. This timeless ceiling fan works in residential environments, restaurants, hospitality or even office settings. The Nan fan has the perfect amount of design presence for any size room or season. The fully adjustable fan motor speeds makes moving the right amount of air simple and easy. The Nan fan will feel like a natural part of the room and enhance any space with a fresh breeze. Also available is the larger Nan XL for larger spaces.

Ar Ruthiane

The Ar Ruthiane's unique hourglass support arms grasp bullet-shaped motor housings which rotate 360° about its teardrop center. The fan heads can be infinitely positioned in 180-degree arcs for optimum air movement; the greater the angles of the motors to the horizontal support rods (up or down), the faster the axial rotation. A slow, controlled axial rotation is achieved by both fan head position and fan blade speed. Matthews 360° rotational fans circulate heat and air conditioning more efficiently than traditional paddle fans. Constructed of cast aluminum, heavy spun and stamped steel, the Ar Ruthiane carries a limited lifetime warranty.

Brisa 2000

Like satellites orbiting a planet, the Brisa's select mahogany blade head and lunar counterweight gently revolve 360° about its spherical gear housing. The fan head can be infinitely positioned in a 180-degree arc for optimum air movement; the greater the angle of the motor to the horizontal support rods (up or down), the faster the axial rotation. A slow, controlled axial rotation is achieved by both fan head position and fan blade speed. Matthews 360° rotational fans circulate heat and air conditioning more efficiently than traditional paddle fans. Constructed of cast aluminum, heavy spun and stamped steel, the Brisa carries a limited lifetime warranty.

Bruna Parede

The Brunu Parede is reminiscent of the wall fans of the early 20th century. The fan head of the Brunu Parede wall mounted fan can be infinitely positioned vertically and horizontally across 180-degree arcs to provide maximum directional airflow. It can be mounted in small, awkward spaces or in front of HVAC ducts to make more efficient the heating, ventilation or air conditioning of any space. Constructed of cast aluminum, heavy spun and stamped steel, the Brunu Parede carries a limited lifetime warranty.

Duplo-Dinamico

Few designs can match the timeless and sophisticated aesthetic of the Duplo-Dinamico 360° rotational fan. Other manufacturers have tried to reproduce this unique design, though all have proven to be of lesser quality and durability. The fan heads can be infinitely positioned in 180-degree arcs for optimum air movement; the greater the angles of the motors to the horizontal support rods (up or down), the faster the axial rotation. A slow, controlled axial rotation is achieved by both fan head position and fan blade speed. Matthews 360° rotational fans circulate heat and air conditioning more efficiently than traditional paddle fans. Constructed of cast aluminum, heavy spun and stamped steel, the Duplo carries a limited lifetime warranty.

Italo Ventania

The Italo Ventania is the largest 360° rotational fan in the Matthews Fan Co collection. Its vortex sculpted arms grasp also remarkable, side-mounted fan heads in gentle, equatorial rotation. The fan heads can be infinitely positioned in 180-degree arcs for optimum air movement; the greater the angle of the motor to the horizontal support rods (up or down), the faster the axial rotation. A slow, controlled axial rotation is achieved by both fan head position and fan blade speed. Matthews 360° rotational fans circulate heat and air conditioning more efficiently than traditional paddle fans. Constructed of cast aluminum, heavy spun and stamped steel, the Ar Ruthiane carries a limited lifetime warranty.
